MARYLAND CHILDREN HEALTH CENTER VACCINATION POLICY

At Maryland Children Health Center, the health and safety of all children in our practice is our highest priority. To best protect our patients—especially newborns and infants who begin receiving vaccinations starting at birth. Their 2-month well visit—we follow the recommended childhood vaccination schedule.

For this reason, **we do not accept patients whose families choose not to vaccinate at all (non-vaccinators).** This policy is in place to help reduce the risk of vaccine-preventable illnesses and to protect our most vulnerable patients, including newborns, infants, and children with weakened immune systems.

Our goal is to ensure the health and well-being of every child to the best of our ability, and we believe this policy helps us provide the safest environment possible for all patients.

We understand that some families may have concerns about vaccines. Our team is available to answer questions and provide education regarding recommended immunizations.

Please note the following:

- We will work with families to **catch up on missed vaccines** and provide a recommended catch-up vaccine schedule.
- If a family prefers **not to receive all vaccines at one visit**, we are willing to discuss an adjusted schedule and delayed administration when medically appropriate.
- We **accept patients with documented medical exemptions** from vaccination when supported by appropriate medical documentation stating vaccines cannot be received for medical reasons.

If you have any questions regarding our vaccination policy, please contact our office. We are happy to discuss any concerns and support your child's healthcare needs.

Thank you for helping us keep all children healthy and protected.
