When to Call 911 or Go to Urgent Care / Emergency Room

**Please note: The symptoms listed below are examples and are not
all-inclusive.**

Seek immediate medical attention if your child has:

- Fever **over 103°F** that does **not improve with Tylenol or Motrin**, and after trying room-temperature cooling measures
- Lethargy (extreme tiredness) of unknown cause
- Vomiting with lethargy
- Shortness of breath or difficulty breathing
- Severe asthma symptoms **not responding to albuterol**
- Child turning blue
- Severe chest pain
- Fainting (syncope) or seizures, with or without fever
- Fall **with loss of consciousness, lethargy, or vomiting**
- Deep cut/laceration that may need stitches
- Severe allergic reaction with:
 - Lip swelling
 - Drooling
 - Shortness of breath
 - Anaphylaxis
- Allergic reaction in a child with a **history of anaphylaxis**
